

Sleek and elegant, the Alfa pointe shoe is ideal for the **moderate-shaped Greek or Roman foot**, where the second toe predominates or two toes of equal length. Handmade in the classic **turned construction** method (made inside out) by craftsmen trained in age-old European shoemaking traditions. Dancers embrace Alfa worldwide. Its clean lines contribute to a **moderate crown height with lowered side and heel measurements**.

An open **U-shaped throat** provides freedom in the vamp area. The throat of the pointe shoe features an **elastic drawstring encased in a cotton binding**. Its **reinforced platform ensures extended wear**, while a silicone gel tip pad applied to the inside of the shoe's platform offers additional comfort.

High wings provide lateral support to the metatarsals. A polyurethane (microfiber) insole and back-quarter panels prevent "sliding" in the shoe and wicks away moisture.

An **embossed leather outsole** marked with a decorative design, including the size, width, and shank strength, provides traction.

Alfa is available with pre-stitched, high-quality **satin or cotton ribbons** free of charge.

Alfa's sizing follows the **UK sizing system**.

ALFA SOFT

Alfa Soft shank provides light support to the arch and is ideal for dancers with tight ligaments or an underdeveloped arch. In most cases, a "beginner" who is starting pointe work will be best served with a soft shank. The minimal support provided by a soft shank will allow the dancer to stretch their ligaments to enable the dancer to stand fully "on top" of their platform. In other cases, a "seasoned" dancer with very tight ligaments may continue to wear a soft shank.

BINDIN : ELASTIC DRAWSTRING

ALFA MEDIUM

Alfa Medium shank provides ample support to the arch for most dancers. For dancers with pliable ligaments, a medium shank allows them to stand "on top" of their platform with great ease.

ALFA HARD

Alfa Hard shank supports a malleable arch with stretched ligaments. For the best support for this type of arch, a hard shank will provide the most significant support. In addition, the shank must conform to the foot's arch. The three-quarter cut shank provides the utmost contact to the arch for maximum support while "en pointe."

ALFA REINFORCED HARD

Alfa Reinforced Hard shank supports a highly flexible foot with stretched ligaments—either through the development of the arch or born with loose ligaments. A reinforced hard shank will provide the ultimate support to the arch. A half shank is best suited for this type of arch to ensure that the shank will conform entirely to the arch.
